tarpARMOR™
a higher level of protection

Innovative Solutions To Keep Workers Safe

FRONT LOADER • SIDE LOADER • REAR LOADER • TRANSFER TRAILER

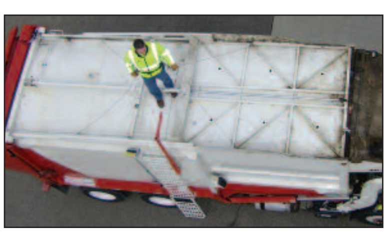
tarpARMOR's Fall Protection System provides superior protection when working at height on refuse collection vehicles and transfer trailers. The complete system includes the patented **Bi-LINE™ Fall Restraint System**, **safeMOUNT™ Ladder Assist**, and **Expandable Garbage Gear™** (EGG).

Bi-LINE™
Fall Restraint

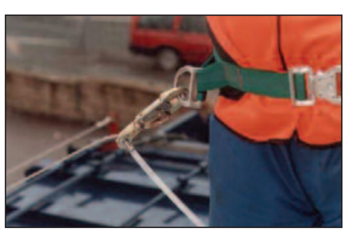
- Bi-LINE allows hands-free movement along full length and width of vehicle
- Operator cannot fall from top of vehicle or into hopper
- System consists of two parallel restraint lines permanently mounted to top of vehicle. Dual lanyard connects operator to restraint lines.
- Operator wears a work positioning belt (not a full body harness)
- Easy to use and adaptable to a wide variety of vehicles, trailers, tanks and containers
- Constructed with stainless steel hardware for strength and durability
- Easily retrofitted to vehicles already in service

safe™ MOUNT

Bolt-on Ladder Assist reduces the chance of slipping or losing balance. Handrail extension allows operator to maintain three points of contact through transition from ladder to top of vehicle.



Operators have freedom to move across full length and width of vehicle



Comfortable work positioning belt connects with swivel safety hook

Protects operator from falls when hand tarping transfer trailers

Low profile design protects system from tree branches and other obstructions

Work Safe. Work Smart.

With Your Feet On The Ground.

Use Your EGG. Keep Your Feet On The Ground When...

- Cleaning Cab Shields
- Cleaning tailgate seals without walking under tailgate
- Cleaning rear loader packing blades from a safe distance
- Adjusting and positioning tarps on roll-offs and transfer trailers
- Removing loose trash from hard to reach areas
